

Combine Pickup Belts

The revolutionary LEGG Flexi-Tooth[®] Belt lets you change tines in the field, without removing the belt!

Legg's patented pick-up teeth, that snap in new, and snap out for replacement, WITHOUT TAKING OFF THE BELT, will save you hours of down time. Made of strong impregnated nylon, these teeth will give you acres and acres of harvest. Legg Company also offers the pick-up belts with traditional bolt on tines, or without tines if you want to reuse your own. A 100% S & Z Twist polyester carcass insures good tracking, and you know what a pain it can be. The 100% polyester will not rot, mildew, or stretch.

LEGG COMPANY, INC., 325 E. 10th Street, Halstead, Kansas 67056

Combine Pickup Belts

LEGG Combine Pickup Belts are also available without tines, ready for Bolt-On tine application!

- 2-ply polyester construction for strength with Clipper® lacing and pin. Holes conveniently punched for Bolt-On type tines.
- Pickup Belts are available with either the **Flexi-Tooth®** tines or the **Bolt-On** type tines, please specify when ordering.

(LEGG COMPANY Snap-in and out Flexi-Tooth® Tines)

Make the educated choice...

LEGG pickup belt is another integral part of your overall harvest. It is important to know all the components that make a good Pickup belt; everything from fabric to the kind of teeth that are used. Until recently, a Bolt-On tine application has been the most popular type of Pickup teeth. LEGG offers an excellent alternative to the traditional Bolt-On tine, the **Flexi-Tooth®** tine. Listed below are special features that have made the LEGG Pickup belt the obvious choice for quality!

Special Features in LEGG Pickup Belt:

Construction:

- Two plies of S & Z twist polyester fabric are used in LEGG Pickup belt for the best tracking and stability.
- LEGG Pickup belts are **OIL RESISTANT** (LEGG OR). Pickup belts won't suffer degradation due to oily crops (i.e. Canola).
- LEGG Pickup belts are ozone and oxidation resistant.

Safety Instructions:

1. Read the Operator's manual for any safety procedures to follow.
2. Do not wear loose clothing that could become entangled in the belting or drive system.
3. Be sure all guards and safety devices are in place before and during operation.

Installation and Care Instructions

1. Be sure all operational power is turned off.
2. Install the belt, making sure it travels in the direction of the **"DIRECTION OF TRAVEL"** arrow. The end with the least number of hooks is the leading end.
3. Pull ends together and insert the pin through the lacing hooks, making sure the hooks on both ends alternate. (Trailing end should have hooks on both outside edges).
4. After inserting the connecting pin completely, bend the straight end at a 90° angle to match the other end.
5. Check you belts, belt lacing, and pin periodically during use. Make repairs or replacements as required.

CAUTION

Be sure to follow all safety and operating instructions to avoid malfunction and/or injury.

BULK COMBINE PICKUP BELTS
